 Github

## Profile

---

front-End Developer proficient in **HTML, CSS, JavaScript, Bootstrap, React, and Material UI (MUI)**. Skilled in building **responsive, cross-browser, and mobile-first web applications** with strong knowledge of **UI/UX principles and modern front-end best practices**. Graduated from the **ITI 6-Month Professional Training Program (Front-End Track)**, enhancing expertise in **React, APIs integration, version control (Git), and responsive design**.

## Education

---

2020/10 – 2024/07      **Bachelor**  
Benha, Egypt                  *Faculty of Computer and Artificial intelligence*  
  
**GPA :** 3.3 - 4.0  
**Grade :** Very Good

## Internship

---

2025/07 – 2025/12      Front-End Development Trainee – ITI 6-Month Professional Training Program.

## Projects

---

### EvTick

Built a full-featured event booking platform supporting online and offline events. Designed and developed a modern, responsive Home page with dynamic sections, animations, and reusable UI components. Implemented a Contact Us page with client-side form validation, user-friendly error handling, and Firebase Firestore integration for storing messages securely.

**Tech :** React.js, Redux, Firebase, Leaflet.js , GetStream.io 

**GitHub Repo :** [https://github.com/Abdallah-Elsaid19/ev\\_tick](https://github.com/Abdallah-Elsaid19/ev_tick) 

### Livingo – E-commerce Website

Developed a responsive e-commerce website using **HTML, CSS, JavaScript, and Bootstrap**. **My Contributions:**  
- Implemented **Categories** and **Shop** pages with interactive product display.  
- Built the **User Dashboard** for managing user-related features.  
- Designed and styled core sections of the website, ensuring a consistent layout and responsive design.

### Product Management System

This project is a comprehensive product management system designed to streamline the process of adding, viewing, searching, and managing products. It features the ability to add multiple products with a single click, display product details, delete individual or all products, and search for products by name or category. The application also calculates product taxes, advertising costs, and final prices automatically. Data validation ensures only accurate information is added, and all product details are persistently stored using local storage.

### Creative Landing Page for iPhones

Developed an interactive and dynamic landing page for showcasing iPhones, where clicking on any iPhone model changes the entire design of the page. The website offers a seamless user experience by updating visuals and content to match the selected phone. The project demonstrates proficiency in front-end technologies, including HTML, CSS, and JavaScript, with a focus on user engagement and responsive design.

## **Portfolio Website** ↗

Portfolio Website using html ,css and javascript. website includes home,about,services,projects and contact. i used javascript to show today's date.

## **Self-Driving Car -Graduation Project** ↗

- Grade : A+

A Self-driving vehicle system designed to tackle Egypt's road safety challenges. Our innovative solution, supported by a sophisticated mobile application, excels at detecting road obstacles and signs, ensuring safer journeys for all.
